The objective of the webinar is designed to help you develop your entrepreneurial vision. Vision is an important part of everyone's future, and this is especially true for entrepreneurs. Establishing your vision is the first of several steps toward making your venture a reality. Many would-be entrepreneurs aspire to launch the next great business or organization that will change the world. Some know exactly what they want to create, whereas others figure it out as they go along. Although there is no secret to success, you do need to have some idea about what you envision for your entrepreneurial future. Entrepreneurial vision imagines a future, whereas goals focus on a desired outcome. Although vision is key to creating the future that you want for yourself and your business, goals are important to help you realize the steps needed to.
