## Report on Hanging pots

Department of Civil Engineering of Jaya Engineering College, inaugurated and organized a Geowaste Management Club on '**Hanging Pots using plastic bottles**' held on 09.09.2022 at Civil Block.

The activity was commenced at 3.00 p.m. The welcome address was given by Dr.S.Rajendran, Principal of Jaya Engineering College. He has highlighted the benefits of geo waste management. Totally 43 members were participated in the activity.

Ms.G.Mylisha/ III year of Civil Engineering student has briefly introduced about the geo waste management- which is a sustainable waste management solutions business, its main purpose is to rethink waste challenges in order to provide innovative ways to manage it. We are the only building materials company with a dedicated business to manage waste and improve circularity within our value chain. It maintains a network of more than 50 operations globally, making it one of the world's leading providers of waste management services. She also described the hanging bottle pot – which is the perfect way to recycle an empty plastic bottle into something useful and creative! Not only does it prevent bottles from ending up in garbage cans, it is also an easy DIY project that can help you hang plants all around your house. Moreover, it takes less than 15-minutes to convert an ordinary bottle into a hanging plant container!

### **Snaps on Hanging Bottle Pot**

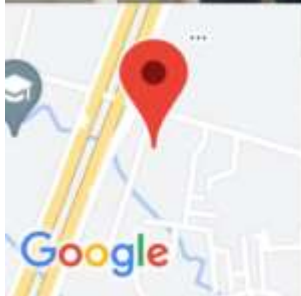

The students grasped the responsibility for actions now in order to improve the world later. All the members were pledged to do their best in order to reduce the plastics. Finally the vote of thanks was delivered by Mr.M.B.Shanmuharajan, Head of the Department (Civil Engineering).
