

ANNA UNIVERSITY, CHENNAI

UNDERGRADUATE CURRICULUM (NON-AUTONOMOUS AFFILIATED INSTITUTIONS)

Programme: B.E., Civil Engineering

Regulations: 2025

Abbreviations:

HUM – Humanities (Languages, Management, Heritage, and others)

BS – Basic Science (Mathematics, Physics, Chemistry)

ES – Engineering Science (General (G), Programme Core (PC), Programme Elective (PE) & Emerging Technology (ET))

SD – Skill Development

SL – Self Learning

CDP – Capstone Design Project

OE – Open Elective

L – Laboratory Course

T – Theory

LIT – Laboratory Integrated Theory

PW – Project Work

IPW – Internship cum Project Work

DIC – Department Introductory Course

TCP – Total Contact Period(s)

Program Outcomes

1. **Engineering Knowledge:** Apply math, science, and engineering fundamentals to complex problems.
2. **Problem Analysis:** Identify and analyze complex problems using research and sustainability principles.
3. **Design Solutions:** Design systems and processes considering health, safety, cost, culture, and environment.
4. **Investigations:** Use experiments, modelling, and data analysis to reach valid conclusions.
5. **Engineering Tools:** Apply modern tools for modelling and problem-solving, recognizing their limits.
6. **Society & Environment:** Assess societal, legal, and environmental impacts of engineering solutions.
7. **Ethics:** Commit to ethics, human values, diversity, and legal compliance.
8. **Teamwork:** Work effectively as an individual and in multidisciplinary teams.
9. **Communication:** Communicate clearly in reports, presentations, and documentation across diverse groups.

10. **Management & Finance:** Apply management and economic principles in projects and teamwork.

11. **Lifelong Learning:** Engage in continuous learning, adapt to new technologies, and think critically.

Program Specific Outcomes (PSOs)

B.E. Civil Engineering

1. To analyze, design, and execute civil engineering projects for real-time applications.
2. Utilize modern tools, software, and equipment for the development of safe, sustainable, and cost-effective civil engineering structures and systems.
3. To keep pace with rapid advancements in the field of Civil Engineering and demonstrate research aptitude, collaborate effectively in teams and uphold ethical practices.

Semester – I

PROGRAMME ELECTIVE COURSES: STREAMS

Structures and Construction Management	Geotechnical Engineering	Transportation	Environment	Water Resources & GIS	Infrastructure
Prefabricated Structures	Ground Improvement Techniques	Traffic Engineering and Management	Solid and hazardous waste management	Hydrology and Water Resources Engineering	Artificial Intelligence in Civil Engineering
Dynamics and Earthquake Resistant Structures	Soil Dynamics	Urban Planning and Development	Industrial wastewater management	Groundwater Engineering	Design of Bridges
Maintenance, Repair and Rehabilitation	Earth Retaining Structures	Intelligent Transportation Systems	Air and noise pollution	Integrated Water Resources Management	Dam Engineering
Energy Efficient Buildings	Rock Mechanics	Pavement Engineering	Environmental Impact Assessment	Remote Sensing and GIS	Underground structures
Construction Management and Safety	Geo-Environmental Engineering	Geomatics for Transportation	Environmental Health and Safety	Geomatics for Hydrology and Water Resources	Formwork Engineering
-	-	-	-	-	Offshore structures

Semester I

MA25C01	Applied Calculus	L	T	P	C
		3	1	0	4
Course Objectives: • To provide technical competence of modelling engineering problems using calculus. • To apply the calculus concepts in solving engineering problems using analytical methods and computational tools.					
Differential Calculus: Functions, graph of functions, New functions from old functions, Limit of a function, Continuity, Limits at infinity, Derivative as a function, Maxima and Minima of functions of single variable, Mean value theorem, Effect of derivatives on the shape of a graph. Activities: Visualization of the functions, Maxima and Minima of a function using open-source software, Solving of Competitive Examination questions (Ex. GATE).					
Functions of Several Variables: Partial derivatives, Chain rule, Total derivative, Maxima and minima of functions of two variables, Method of Lagrange's Multipliers, Application problems in engineering. Activities: Partial Derivatives with two or three variables, Maxima and Minima of a function using open-source software, Solving of Competitive Examination questions (Ex. GATE).					
Integral Calculus: Fundamental theorem of Calculus, Indefinite integrals and the Net Change Theorem, Improper integrals, Arc Length, Area of Region, Area of surface of revolution. Activities: Definite and Indefinite Integrals, Determination of Area, Solving of Competitive Examination questions (Ex. GATE).					
Multiple Integrals: Iterated integrals and Fubini's theorem, Evaluation of double integrals, change of order of integration, change of variables between Cartesian and polar co-ordinates, evaluation of triple integrals-change of variables between Cartesian and cylindrical and spherical co-ordinates. Activities: Double integrals and triple integrals using open-source software, Solving of Competitive Examination questions (Ex. GATE).					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%.					
Methodology for Continuous Assessment: Assignments (20%), Solution to application-oriented problems using software (20%), Solving of Competitive Exam questions (20%), Internal Examinations (40%).

	Description of CO	PO	PSO
CO1	Explain the meaning of derivative, integral, and their geometric and physical interpretations.	---	---
CO2	Apply differentiation and integration techniques to compute maxima, minima, and area.	PO1(3)	PSO1(2) PSO2(2)
CO3	Analyze the behavior of single and multivariable functions using derivatives and partial derivatives.	PO2(3)	PSO1(2) PSO3(1)
CO4	Utilize modern computational software and online platforms to deepen understanding, perform complex calculations, and visualize mathematical concepts.	PO5(2) PO11(1)	PSO2(3) PSO3(1)

CE25C01	Introduction to Civil Engineering	L	T	P	C
		3	0	0	3
Course Objective: To impart the significance of the Civil Engineering and provide insight to the essentials of components of infrastructure.					
Overview of Civil Engineering: Role of civil engineers in society, Ethics in Civil Engineering Practice, outstanding accomplishments of the profession, future trends-Types of projects, stages of projects, specification and scope.					
Fields of Civil Engineering: Overview of Structural, Construction, Geotechnical, Environmental, Transportation, Water Resources and Environmental Engineering – Introduction to Engineering Geology and seismology.					
Civil Engineering Materials: Civil Engineering Materials: Bricks – Stones – Sand – Cement – Concrete – Steel – Timber, Glass - Modern Materials, Thermal and Acoustic Insulating Materials, Decorative Panels, Water Proofing Materials. Modern uses of Gypsum, Pre-fabricated Building components.					
Building Components: Building plans – Setting out of a Building - Foundations: Types of foundations - Bearing capacity and settlement – Brick masonry – Stone Masonry – Beams – Columns – Lintels – Roofing – Flooring – Plastering- NBC.					
Infrastructure: Types of Bridges and Dams – Water Supply Network - Rain Water Harvesting – Solid Waste Management system- Introduction to Highways and Railways - Introduction to Green Buildings. Activities: An Industrial visit to a nearby Civil Engineering Projects. Seminar / assignment on Emerging Civil Engineering fields.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz (10%), Assignments (40%) and Internal Examinations (50%)

Tata McGraw Hill.					

	Description of CO	PO	PSO
CO1	Explain core Civil engineering concepts.	---	---
CO2	Apply basic engineering calculations in Civil Engineering systems.	PO1(3)	PSO1(3) PSO2(1)
CO3	Identify practices followed in infrastructure construction.	PO2(2)	PSO2(2) PSO3(1)

PH25C01	Applied Physics – I	L	T	P	C
		2	0	2	3
Course Objective(s): To impart knowledge and expose the essentials of physics in various engineering applications.					
Properties of Matter: Elasticity, Cantilever, Young's modulus (non-uniform bending), Girders: Bridges and buildings, Viscosity: Stokes method, Surface tension: drop weight method, Thermal expansion, Thermal stress, Bimetallic strips, Expansion joints Practical: Non-Uniform bending, Young's modulus of the material, Torsional pendulum, Rigidity modulus of the wire and moment of inertia of the disc. Activities: Virtual demonstration of thermal stress.					
Oscillations: Simple Harmonic motion, Torsional pendulum, Couple per unit twist, Damped and Forced Oscillation Waves: Waves on a stretched string, Energy and Power, standing waves, Ultrasonics, piezo, electric method, Acoustic grating, Electromagnetic waves: Maxwell equation, Production of EM waves by dipole antenna, Propagation of EM waves in free space , wave equation, Cell phone reception Practical: Melde's string experiment – Frequency of an electrically vibrating metal tip. Activities: Virtual demonstration of propagation of EM waves					
Quantum Mechanics: Black body radiation, Photoelectric effect, de Broglie hypothesis, Schrodinger Wave equation, Particle in a box (infinite potential well - three-dimensional box), Barrier penetration and quantum tunnelling. Practical: Photo-electric effect, Determination of Planck's constant. Activities: Virtual demonstration of Scanning Transmission Electron Microscope					
Applied Optics: Interference: Air wedge, Michelson's Interferometer, Fiber optics: Structure of a fiber, Fiber Optic Communication System, Fiber Sensors (Virtual demo), Displacement, pressure sensor and Temperature sensor, Einstein Co-efficient, Nd:YAG laser, CO ₂ laser (construction, functioning and applications), dye laser Practical: Ruling width of Compact disc using Laser, Thickness of a thin sheet/wire using Air wedge Method. Activities: Demonstration of sensors and applications of Lasers					
Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%					
Methodology for Continuous Assessment: Quiz (5%), Assignments (20%), Flipped Class (5%), Practical (30%), Internal Examinations (40%)

	Description of CO	PO	PSO
CO1	Explain the physics concepts in various applications.	---	---
CO2	Apply the principles of wave optics and laser physics in practical systems.	PO1(3)	PSO1(2) PSO2(2)
CO3	Analyse the behaviour of materials under different conditions.	PO2(2)	PSO1(2) PSO3(1)
CO4	Conduct experiments in groups and interpret the data.	PO4(3) PO8(1)	PSO1(2) PSO2(2)

CY25C01	Applied Chemistry – I	L	T	P	C
		2	0	2	3
Course Objectives: • To provide students with a solid understanding of the chemical principles for engineering applications. • To introduce the chemical properties of materials and how these properties influence the selection and use of materials in engineering systems. • To impart practical applications of chemistry in commonly used engineering devices					
Water Technology: Water quality parameters and standards. Industrial feed water, Remediation. Municipal water treatment. Desalination. Practical: Analysis of alkalinity, hardness and dissolved oxygen. Activity: Coagulation of water sample using Alum					
Nano-chemistry: Classification, Size, dependent properties. Preparation of nanomaterials, Top-down and Bottom-Up approaches, Applications (Flipped classroom). Practical: Preparation of nanoparticles by Sol-Gel method.					
Electrochemistry: Electrochemical cell, Electrode potential., Redox reaction. Conductivity of electrolytes, Factors. Practical: Conductometric titrations Activity: Electrochemical cell demonstration					
Corrosion & Control: Chemical and electrochemical corrosions, galvanic series, factors influencing corrosion, Electrochemical protection. Organic and Inorganic coating. Practical: • Corrosion study by weight loss and salt spray method. • Potentiometry/UV-visible spectrophotometer. Activities: Case Study on Corrosion in Pipelines and Electronics, Control measures for a corroded metal					
Batteries: Conventional, Contemporary and Emerging battery storage technologies, Primary & Secondary Batteries, Battery Pack, Battery Materials, Performance Parameters, Testing, Safety aspects. Practical: Measurement of EMF, Internal Resistance, Charge and Discharge Characteristics. Activities: Demonstration of battery pack in e-vehicles.					

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Assignments (20%), Flipped Class (5%), Practical (30%), Internal Examinations (40%)

	Description of CO	PO	PSO
CO1	Understand the importance of chemistry applications with underlying mechanisms.	---	
CO2	Apply the chemistry concepts in widely used devices.	PO1(3)	PSO1(2) PSO2(2)
CO3	Analyse the effect of various chemical parameters on performance of engineering systems.	PO2(2)	PSO1(2) PSO2(1)
CO4	Perform experimentations as a group and interpret the results.	PO4(3) PO8(1)	PSO2(2) PSO3(2)
CO5	Communicate findings through case studies and reports	PO9(1)	PSO2(2) PSO3(3)

ME25C01	Engineering Drawing	L	T	P	C
		2	0	4	4
Course Objectives: • To impart knowledge on dimensions and drawing standards. • To explore the orthographic projection of lines and solids. • To provide the understanding of orthographic, isometric and perspective views.					
Fundamentals: Drawing instruments, Drawing standards (BIS), Lettering in engineering, Sheet layout, elements of dimensioning, Systems of dimensioning. Free hand sketching of 2D & 3D objects, Conics – Ellipse, Parabola and Hyperbola. Activities: Virtual Demonstration of Conics and Cycloids.					
Orthographic Projection: First angle projection, Projection of points, straight lines and planes.					
Projection of Solids: Simple Solids, Section of Solids, Development of Surfaces Activities: Development of models of various solids and virtual demonstration of sectioning, CAD modelling of 2D objects.					
Isometric Projection: Isometric Scale, Projection of Simple solids. Activities: Conversion of 3D into 2D orthographic views, CAD modelling of 3D objects.					
Perspective Projection: Simple solids projection Activities: Virtual demonstration of perspective views.					
Project: Development of 2D objects and 3D objects using CAD tools.					
Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%					
Methodology for Continuous Assessment: Project – 10%, Models - 5%, Assignments - 35% and Internal Examinations - 50%

	CO Description	PO	PSO
CO1	Explain the advantages of engineering drawing in engineering applications	---	
CO2	Apply the concepts of projections in formulating various solid parts in engineering systems.	PO1(3)	PSO1(2)
CO3	Analyse the various view and interpret the engineering drawings.	PO2(3)	PSO1(2)
CO4	Use CAD tools for creation of various models.	PO3(1)	PSO2(2)
CO5	Critically think and develop innovative models.	PO11(1)	PSO3(1)

UC25H01	தமிழர் மரபு	L 1	T 0	P 0	C 1
மொழி மற்றும் இலக்கியம்: இந்திய மொழிக் குடும்பங்கள், திராவிட மொழிகள், தமிழ் ஒரு செம்மொழி, தமிழ் செவ்விலக்கியங்கள், சங்க இலக்கியத்தின் சமயச் சார்பற்ற தன்மை, சங்க இலக்கியத்தில் பகிர்தல் அறம், திருக்குறளில் மேலாண்மைக் கருத்துக்கள், தமிழ்க் காப்பியங்கள், தமிழகத்தில் சமண பௌத்த சமயங்களின் தாக்கம், பக்தி இலக்கியம், ஆழ்வார்கள் மற்றும் நாயன்மார்கள், சிற்றிலக்கியங்கள், தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி, தமிழ் இலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.					
மரபு - பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை - சிற்பக் கலை: நடுகல் முதல் நவீன சிற்பங்கள் வரை, ஐம்பொன் சிலைகள், பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினைப் பொருட்கள், பொம்மைகள் , தேர் செய்யும் கலை, சுடுமண் சிற்பங்கள், நாட்டுப்புறத் தெய்வங்கள், குமரிமுனையில் திருவள்ளுவர் சிலை, இசைக் கருவிகள், மிருதங்கம், பறை, வீணை, யாழ், நாதஸ்வரம், தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு.					
நாட்டுப்புறக் கலைகள் மற்றும் வீர விளையாட்டுகள்: தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஓயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம், தமிழர்களின் விளையாட்டுகள்.					
தமிழர்களின் திணைக் கோட்பாடுகள்: தமிழகத்தின் தாவரங்களும், விலங்குகளும், தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள், தமிழர்கள் போற்றிய அறக்கோட்பாடு, சங்ககாலத்தில் தமிழகத்தில் எழுத்தறிவும், கல்வியும், சங்ககால நகரங்களும் துறை முகங்களும், சங்ககாலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி, கடல்கடந்த நாடுகளில் சோழர்களின் வெற்றி.					
இந்திய தேசிய இயக்கம் மற்றும் இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு: இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு, இந்தியாவின் பிறப்பகுதிகளில் தமிழ்ப் பண்பாட்டின் தாக்கம் , சுயமரியாதை இயக்கம் இந்திய மருத்துவத்தில், சித்த மருத்துவத்தின் பங்கு, கல்வெட்டுகள், கையெழுத்துப்படிிகள், தமிழ்ப் புத்தகங்களின் அச்ச வரலாறு.

UC25H01	Heritage of Tamils	L	T	P	C
		1	0	0	1
Language and Literature: Language Families in India, Dravidian Languages, Tamil as a Classical Language, Classical Literature in Tamil, Secular Nature of Sangam Literature, Distributive Justice in Sangam Literature, Management Principles in Thirukural, Tamil Epics and Impact of Buddhism & Jainism in Tamil Land, Bakthi Literature Azhwars and Nayanmars, Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.					
Heritage - Rock Art Paintings to Modern Art – Sculpture: Hero stone to modern sculpture, Bronze icons, Tribes and their handicrafts, Art of temple car making, Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments, Mridhangam, Parai, Veenai, Yazh and Nadhaswaram, Role of Temples in Social and Economic Life of Tamils.					
Folk and Martial Arts: Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leatherpuppetry, Silambattam, Valari, Tiger dance, Sports and Games of Tamils.					
Thinai Concept of Tamils: Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature, Aram Concept of Tamils, Education and Literacy during Sangam Age, Ancient Cities and Ports of Sangam Age, Export and Import during Sangam Age, Overseas Conquest of Cholas.					
Contribution of Tamils to Indian National Movement and Indian Culture: Contribution of Tamils to Indian Freedom Struggle, The Cultural Influence of Tamils over the other parts of India, Self-Respect Movement, Role of Siddha Medicine in Indigenous Systems of Medicine, Inscriptions & Manuscripts, Print History of Tamil Books

EN25C01	English Essentials – I	L	T	P	C
		2	0	0	2
Course Objectives: - Enhance learners’ listening and speaking skills to understand and deliver speeches effectively - Equip students with the skills to write clear, coherent, and grammatically correct texts for various purposes. - Strengthen the ability to comprehend, interpret, and analyse written English across diverse contexts.					
Speaking Skills: Self-Introduction (Tenses, Adjectives) Expressing opinions (Subject-Verb Agreement), Participating in Conversations (Speech Acts - agreeing & disagreeing – synonyms and antonyms) Suggested Activities: Self-Introduction, Just a Minute (JAM) Video recording, Situational role plays, Spell Bee, Word Substitution, Usage of Apps.					
Listening Skills: Listening to Simple Conversations (Understanding tone and intent), Short Speeches / Stories, Extracting information, Pronunciation, Listening to Various Accents. Suggested Activities: Listening and Repeating, Gap fill exercises, Note-taking					
Reading Skills: Reading Strategies – (Skimming, scanning, predicting) intensive reading - short passages and long passages on suggested themes (Sentence Patterns, Prefixes and suffixes, idioms and phrases). Activities: Reading - newspaper and digital articles, Cloze, Reading comprehension, note making and summarising,					
Writing Skills: Word Substitution, Sentence Formation, Hints Development (Guided Writing), Writing Different Types of Paragraphs - (Sentence Structure) – Letter Writing / Emails (Informal) Activities: Error Detection, Picture and poster description, Descriptive, Narrative and Comparative paragraphs, Brainstorming and Mind Mapping - Informal letters/ Emails					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz (10%), Assignments (20%), Speaking Task (10%), Reading Task (10%), Writing Task (10%), Internal Examinations (40%).

	Description of CO	PO	PSO
CO1	Listen and comprehend spoken English, take and draft notes.	---	---
CO2	Apply vocabulary and grammar appropriately to communicate in written and spoken forms.	PO1(3)	PSO1(2) PSO3(3)
CO3	Analyze texts in different contexts using appropriate reading strategies.	PO2(2)	PSO2(1)
CO4	Communicate thoughts and ideas in real life situations.	PO9(2)	PSO3(2)
CO5	Develop communication skills relevant to engineering and technology.	PO11(1)	PSO3(3)

CS25C02	Computer Programming: Python	L	T	P	C
		2	0	2	3
Course Objectives: - To equip engineering students with the foundational knowledge and practical skills in Python programming to analyse and solve computational problems effectively. - To foster problem-solving, critical thinking, and modular programming skills essential for engineering domains.					
Introduction to Python: Problem Solving, Problem Analysis Chart, Developing an Algorithm, Flowchart and Pseudocode, Interactive and Script Mode, Indentation, Comments, Error messages, Variables, Reserved Words, Data Types, Arithmetic operators and expressions, Built-in Functions, Importing from Packages.					
Practical: Problem Analysis Chart, Flowchart and Pseudocode Practices. (Minimum three)					
Control Structures: if, if-else, nested if, multi-way if-elif statements, while loop, for loop, nested loops, pass statements.					
Practical: Usage of conditional logics in programs. (Minimum three)					
Functions: Hiding redundancy, complexity; Parameters, arguments and return values; formal vs actual arguments, named arguments, Recursive & Lambda Functions.					
Practical: Usage of functions in programs. (Minimum three)					
Strings & Collections: String Comparison, Formatting, Slicing, Splitting, Stripping, Lists, tuples, and dictionaries, basic list operators, searching and sorting lists; dictionary literals, adding and removing keys, accessing and replacing values.					
Practical: String manipulations and operations on lists, tuples, sets, and dictionaries. (Minimum three)					
File Operations: Create, Open, Read, Write, Append and Close files. Manipulating directories, OS and Sys modules, reading/writing text and numbers, from/to a file; creating and reading a formatted file (csv, tab-separated, etc.).					
Practical: Opening, closing, reading and writing in formatted file format and sort data. (Minimum three)					
Packages: Built-in modules, User-Defined modules, Numpy, SciPy, Pandas, Scikit-learn.					
Practical: Usage of modules and packages to solve problems. (Minimum three), Project (Minimum Two)					
Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%					

Methodology for Continuous Assessment: Quiz (5%), Project (15%), Assignment Programs (25%), Practical (25%), Internal Examinations (30%)

	Description of CO	PO	PSO
CO1	Explain the potential usage of Python in engineering applications	---	---
CO2	To apply the concepts of Python in solving engineering problems and formulate new projects.	PO1 (2) PO5 (2)	PSO2(2) PSO3(1)
CO3	To interpret the data and effectively communicate in groups.	PO2 (3) PO8 (1) PO9 (1)	PSO3(1) PSO3(2)
CO4	Adapt new programming concepts and technologies in the profession.	PO11 (1)	PSO2(2)

ME25C04	Makerspace	L	T	P	C
		0	0	4	2
Course Objectives:					
1. To impart practical skills in the assembly, disassembly, and welding of components using appropriate tools and techniques. 2. To provide hands-on training in electrical wiring practices, and the use of electronic components, sensors, and actuators.					
List of Activities					
(A). Dis-assembly & Assembly Practices i. Tools and its handling techniques. ii. Dis-assembly and assembly of home appliances – Grinder Mixer Grinder, Ceiling Fan, Table Fan & Washing Machine. iii. Dis-assembly and assembly of Air-Conditioners & Refrigerators. iv. Dis-assembly and assembly of a Bicycle. (B). Welding Practices i. Welding Procedure, Selection & Safety Measures. ii. Power source of Arc Welding – Gas Metal Arc Welding & Gas Tungsten Arc Welding processes. iii. Hands-on session of preparing base material & Joint groove for welding. iv. Hands-on session of MAW, GMAW, GTAW, on Carbon Steel & Stainless Steel plates / pipes, for fabrication of a simple part. (C). Electrical Wiring Practices i. Electrical Installation tools, equipment & safety measures. ii. Hands-on session of basic electrical connections for Fuses, Miniature Circuit Breakers and Distribution Box. iii. Hands-on session of electrical connections for Lightings, Fans, Calling Bells. iv. Hands-on session of electrical connections for Motors & Uninterruptible Power Supply. (D). Electronics Components / Equipment Practices i. Electronic components, equipment & safety measures. ii. Dis-assembly and assembly of Computers. iii. Hands-on session of Soldering Practices in a Printed Circuit Board. iv. Hands-on session of Bridge Rectifier, Op-Amp and Transimpedance amplifier. v. Hands-on session of integration of sensors and actuators with a Microcontroller.					

vi. Demonstration of Programmable Logic Control Circuit.
(E). Contemporary Systems i. Demonstration of Solid Modelling of components. ii. Demonstration of Assembly Modelling of components. iii. Fabrication of simple components / parts using 3D Printers. iv. Demonstration of cutting of wood / metal in different complex shapes using Laser Cutting Machine.

	Description of CO	PO	PSO
CO1	Demonstrate proper use and handling of basic hand and power tools.	---	---
CO2	Carry out electrical wiring installations and repairs, applying safety measures in domestic applications.	PO1(3)	PSO2(1)
CO3	Develop solid innovative models through software.	PO5(2)	PSO2(2)
CO4	Adapt and follow safety protocols in the work environment.	PO11(2)	PSO3(2)

UC25A01	Life Skills for Engineers – I	L	T	P	C
		1	0	2	1
Course Objectives - To equip engineering students with essential life skills encompassing personal and emotional development, effective management of time and stress, financial literacy, digital safety, and civic responsibility. - To enhance self-awareness, interpersonal skills, and resilience to prepare students for the professional and personal challenges of engineering careers and life beyond academics.					
Personal and Emotional Development: Self-Awareness & Personality, Emotional Intelligence & Empathy, Positive thinking, Right attitude, Stress & Anger Management, Goal-Setting & Time Management, Growth Mindset & Resilience. Activities: Personality tests (MBTI, DISC), reflection journals, Empathy circle, role-playing difficult conversations, Guided mindfulness sessions, stress relief toolkit creation, Vision board creation, weekly time audit and planner, Group challenge scenarios, resilience journal.					
Management Skills: Financial Literacy: Budgeting & Saving, Nutrition, Health, and Hygiene, Digital Literacy & Online Safety, Civic Responsibility & Ethics Activities: Create a monthly budget, financial simulation game, Meal planning workshop, physical wellness challenge, Social media audit, privacy and safety scenarios, Community service, values debate.					
Weightage: Continuous Assessment: 100%					
Methodology for Continuous Assessment: Assignments (20%), Flipped Class & Worksheets (10%), Practical (30%), Internal Examinations (40%)

	Description of CO	PO	PSO
CO1	Understand personality traits and emotional intelligence, in interpersonal interactions.	---	---
CO2	To work and execute as a team through successful implementation of set goals.	PO7 (1) PO8 (2) PO9 (2)	PSO3(2)
CO3	Develop and implement best practices in day-to-day life, in terms of planning and execution.	PO11 (3)	PSO3(2)

UC25A02	Physical Education - I	L	T	P	C
		0	0	4	1
Course Objectives: • To impart the fundamentals of physical education for development of students' physical, mental, and social well-being. • To instill a lifelong appreciation for physical activity towards the development of positive attitude and fostering values of team work and sportsmanship.					
Introduction to physical education: Exercise for Good Posture – Conditioning and Calisthenics for Before start, Jogging, Bending, Twisting, Standing, Sitting and Relaxation, Training on First Aid Practices.					
Participation of athletic events: Rules and regulations of important athletic events, Sprint, Jumps, Throws and Hurdles.					
Skill development in any one of the following outdoor games: Basket Ball, Volley Ball, Ball Badminton, Football, Hockey, Kho-Kho, Kabaddi, Cricket, Hand ball and Tennis.					
Skill development in any one of the following indoor games: Shuttle Badminton, Chess and Table Tennis.					
Weightage: Continuous Assessment: 100%					
Methodology for Continuous Assessment: Attendance (60%), Quiz (10%), Participation in Sports and Games (20%) and Viva Voce (10%)					
References: 1. Singh, A. (2008). Essentials of physical education. Kalyani Publishers. 2. Kamlesh, M. L. (2006). Psychology in physical education and sport (3rd ed.). Metropolitan Book Co. 3. Mangal, S. K. (2009). <i>Psychology of sports performance</i>. Sports Publication.					
E-resources: https://www.who.int/health-topics/physical-activity					

	CO Description	PO	PSO
CO1	Understand and explain the importance of physical activity for mental and physical health.	---	---
CO2	Apply basic principles of exercise science in the routine life.	PO1(3)	PSO1(1)
CO3	Develop teamwork, discipline, and leadership through sports and group activities and collaborate effectively.	PO8(3)	PSO3(2)
CO4	Demonstrate independent learning in health, nutrition, and fitness-related topics.	PO11(2)	PSO3(2)

Semester II

MA25C02	Linear Algebra	L	T	P	C
		3	1	0	4
Course Objectives: - To impart foundational knowledge in linear algebra essential for analysing and solving problems in engineering applications. - To provide the knowledge on computation using software and interpret key linear algebra concepts using software.					
Vector Spaces Introduction to Vector Spaces, Examples, Subspaces, Linear Combinations, Span, Generating Sets, Linear Dependence and Independence, Basis and Dimension, Dimension of Subspaces. Activities: Open-Source software, exercises to test linear dependence and independence using rank, compute span and basis of a set of vectors, determine the dimension of subspaces, and illustrate the concept of subspace and basis in R^2/R^3 with visualization.					
Linear Transformations and Diagonalization: Null space, Range, Dimension Theorem (statement only), Matrix representation of a linear transformation, Eigenvalues & Eigenvectors, Diagonalizability. Activities: Open-Source software, exercises to compute the matrix representation of a linear transformation, find the null space and range of a matrix, and compute eigenvalues and eigenvectors of a matrix.					
Inner Product Spaces: Inner product, Norms, Cauchy, Schwarz inequality, Gram, Schmidt orthogonalization, Simple problems (up to R^3). Activities: Open-Source software, exercises to compute inner products and vector norms.					
Matrix Decomposition: Orthogonal transformation of a symmetric matrix to diagonal form - Positive definite matrices, QR decomposition, Singular Value Decomposition (SVD), Least squares solutions- simple problems (up to 3×3 matrices). Activities: Open-Source software, exercises to check if a matrix is positive definite, perform QR decomposition and SVD using built-in functions.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%.					
Methodology for Continuous Assessment: Assignment (20%), Software activity (20%), Quiz (20%), Internal Examinations (40%).

	Description of CO	PO	PSO
CO1	Explain the fundamental concepts of Linear Algebra.	---	
CO2	Compute and interpret eigenvalues and eigenvectors.	PO1(3)	PSO1(2)
CO3	Apply inner product concepts and perform orthogonalization.	PO1(3)	PSO1(1)
CO4	Compute least squares solutions of linear system of equations.	PO1(2) PO2(2)	PSO3(1)
CO5	Use MATLAB to implement and validate key linear algebra concepts	PO5 (1) PO11(1)	PSO2(2)

ME25C02	Engineering Mechanics	L	T	P	C
		3	1	0	4
Course Objectives: • To introduce the fundamental concepts and principles of statics related to forces acting on particles and rigid bodies. • To develop the ability to formulate and apply equilibrium equations for particles and rigid bodies in two and three dimensions. • To enable students to analyse force systems through vector resolution and calculation of moments and couples.					
Statics of Particles: Resultant of forces in a plane, Equilibrium of a particle in a plane, Addition of concurrent forces in space, Equilibrium of a particle in space. Activities: Assignments and Quiz on resultant forces, Solving of Competitive Exam questions.					
Statics of Rigid Bodies: Concept of Free Body Diagram, Equivalent systems of forces, Transmissibility, Moment of a force about a point and an axis, Couples and force-couple systems, Equilibrium of rigid bodies in two and three dimensions, Principle of virtual work. Activities: Virtual demonstration of rigid bodies, Solving of Competitive Exam questions.					
Moments of Inertia: First moments of areas and lines, Centroids of composite areas and lines, Theorems of Pappus-Guldinus, Second moment of area, Parallel axis theorem, Rectangular and Polar Moments of inertia of composite areas, Radius of Gyration, Product of Inertia, Principal Axes and Principal Moments of Inertia, Mass moments of inertia of thin plates. Activities: Virtual Simulation of Moment of Inertia, Principal Axes Determination, Solving of Competitive Exam questions.					
Friction: Laws of friction, Coefficients of Friction, Angles of Friction, Types of Friction Problems, Wedges and Ladder friction, Belt friction. Activities: Virtual Demonstration of Friction in belts and pulleys, Solving of Competitive Exam questions					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Assignments - 20%, Solving of Competitive Exam questions (20%) and Internal Examinations - 50%

	CO Description	PO	PSO
CO1	Explain the principles of statics in determination of forces acting on particles and rigid bodies.	---	---
CO2	Apply equilibrium conditions to predict the behaviour of particles and rigid bodies under various force configurations	PO1(3)	PSO1(3)
CO3	Analyse various systems through resolution of forces and moments.	PO2(2)	PSO1(2)
CO4	Demonstrate the ability to engage in adapting new techniques in the analysis of force and moments in a system.	PO11(1)	PSO2(2) PSO3(1)

PH25C02	Applied Physics (CE) – II	L	T	P	C
		2	1	0	3
Course Objectives: To provide a comprehensive understanding of physics concepts in Civil engineering applications.					
Mechanic: Elasticity – Types of supports and loads – free body diagrams - Equilibrium of rigid bodies – Types of structures: Beams, frames, trusses – Analysis of trusses – internal forces in members – Moment of inertia and bending- cantilever Activities: Virtual Demonstration of deflection of beams and moment of inertia.					
Acoustics: Reverberation – Loudness – Focusing – Echelon – Noise – Echo - Resonance – Interference – Sabine’s formula (Derivation) – Absorption coefficient – Sonometer - Sound insulation. Activities: Virtual Demonstration of sound insulation and resonance.					
Lighting: Visual field glare, colour – day light calculations – day light design of windows, measurement of day light and use of models and artificial skies - artificial lighting – LED characteristics. Activities: Virtual Demonstration of heat infiltration in glass, glass as building material, LED Characteristics.					
Engineering Materials: Composites – Fibre Reinforced Plastics (FRP) – Fiber Reinforced Metals (FRM) – Fiber Reinforced Bricks (FRB) - Shape memory alloys – Ceramics – Thermal, Mechanical, Electrical and Chemical properties –3D printed construction materials - Nano materials. Activities: Demonstration of 3D printing of materials, Composite fabrication.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz (10%), Assignments (30%), Flipped Class (10%), Internal Examinations (50%)

	Description of CO	PO	PSO
CO1	Explain the concepts of physics in civil engineering stream.	---	
CO2	Apply appropriate techniques in physics to solve engineering problems.	PO1(3)	PSO1(3)
CO3	Analyse physical systems and interpret data from the virtual studies in the core branches in civil engineering.	PO2(2)	PSO1(2)

EE25C01	Basic Electrical and Electronics Engineering	L	T	P	C
		3	0	0	3
Course Objectives: To impart foundational knowledge in principles and applications of electrical and electronics engineering.					
DC Fundamentals: Current and Voltage sources, Resistance, Inductance and Capacitance; Ohm's law, Kirchhoff's law, Series parallel combination of R, L and C components, Voltage Divider and Current Divider Rules. Activities: Virtual Demonstration of electrical laws & circuits, Hands-on Breadboarding, Solving Competitive Exam questions.					
AC Fundamentals: Faraday's Laws of Electro-magnetic Induction, Definition of Self and Mutual Inductances, Generation of sinusoidal voltage, Instantaneous & RMS values of sinusoidal signals, Introduction to 3-phase systems, Electrical Safety, Fuses and Earthing. Activities: Virtual Demonstration of electromagnetic induction, Measurement of instantaneous and RMS values of AC signals, Solving Competitive Exam questions.					
Electric Machines: DC Machines, Transformers, Star and delta Connections, Three phase Induction motors, Synchronous Generators, Single Phase Induction Motors, Stepper Motor, Universal Motor and BLDC motor. Activities: Virtual demonstration of step-up and step-down transformers, Virtual working models of Universal and BLDC motors, Solving Competitive Exam questions.					
Semiconductor Devices: PN junction diodes, Zener Diode, Voltage regulator, BJT & FET Transistors, Timers, Operational Amplifiers. Activities: Virtual demonstration of V-I characteristics of PN junction and Zener diodes using simulation, inverting/non-inverting amplifiers, Solving Competitive Exam questions.					
Digital Electronics: Boolean algebra, Basic and Universal Gates, adders, multiplexers, demultiplexers and flip-flops. Activity: Online logic gate simulators, Solving Competitive Exam questions.					
Microcontrollers: Introduction, Architecture, Potential Applications. Activities: Physical demonstration of a microcontroller and online simulation of microcontroller.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					

Methodology for Continuous Assessment: Quiz (5%), Assignments (25%), Competitive Exam Questions (20%), Internal Examinations (50%)

CE25201	Construction Materials and Technology	L	T	P	C
		3	0	0	3
Course Objectives: - To impart fundamental knowledge of traditional and modern building materials used in construction. - To introduce methods of construction such as masonry, formwork, scaffolding, plastering, and joints.					
Stones, Bricks and Concrete Blocks: Stone as building material, Criteria for selection, Tests on stones, Deterioration and preservation of stonework. Bricks, Classification, Manufacturing of clay bricks, Tests on bricks, Compressive strength, Water absorption, Efflorescence, Bricks for special uses, Refractory bricks. Concrete blocks, Types, Hollow and solid blocks, Lightweight concrete blocks, Applications.					
Activities: Visit to brick / block manufacturing plant.					
Lime, Cement, Aggregates and Mortar: Types, Preparation of lime mortar, Applications. Cement, Ingredients, Manufacturing process, Types and grades, Properties: hydration, compressive and tensile strength, soundness, consistency, setting time. Fine aggregates, River sand, crushed stone sand (M and P-Sand), Properties. Coarse aggregates, Crushing strength, impact strength, flakiness and elongation index, abrasion resistance, Grading. Mortar, Cement and lime mortars, Uses and proportions.					
Activities: Virtual Demonstration of Cement Manufacturing.					
Timber, Metals and Other Materials: Timber, Market forms, Industrial timber, Plywood, Laminated panels. Metals, Steel, Aluminum, Composition, properties, Market forms, Mechanical treatment, Aluminum composite panels. Surface finishes, Paints, Varnishes, Distempers, Bituminous products. Sealants for joints, Insulating materials, Acoustic and thermal insulation, Fire protection, Damp proofing, Ventilation, Air conditioning.					
Construction Technology and Construction Practices: Masonry construction, Brick and stone masonry. Formwork, Centering, shuttering, Scaffolding, Shoring, Underpinning. Construction joints, Contraction, construction and expansion joints. Plastering, Pointing, Cavity and diaphragm walls.					
Activities: Virtual Demonstration of different types of masonry works.					
Advanced Materials: Advanced materials, Glass, Solar Panels - Ceramics, Clay products, Refractories, Fibre reinforced plastics, Fibre textiles, Geomembranes, Geotextiles. Composite materials, Types, Laminar composites, Applications in construction.					
Activities: Visit to Construction sites, virtual demonstration of FRP.					

Construction Equipment and Planning: Construction equipment, Selection for earthwork, concreting, material handling, dewatering and pumping. Construction planning.

Activities: Case Study in Concrete Mixing Plan.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz (10%), Assignments (40%) and Internal Examinations (50%)

CO	CO Description	PO Mapping	PSO
CO1	Explain the properties, classifications, and applications of conventional and advanced building materials.	---	---
CO2	Evaluate the quality and suitability of stones, bricks, cement, lime, aggregates, and mortar using standard tests.	PO1(3) PO2(2)	PSO1(2)
CO3	Apply knowledge of construction practices such as masonry, formwork, scaffolding, joints, and finishes in building works.	PO2(2) PO4(2)	PSO2(2)
CO4	Utilize construction planning techniques (CPM, PERT, network models) and equipment selection for effective project execution.	PO2(2) PO4(2)	PSO2(3) PSO3(1)

EN25C02	English Essentials – II	L	T	P	C
		1	0	2	2
Course Objectives • Enable learners to improve fluency and accuracy in spoken and written communication. • Develop learners’ ability to articulate ideas clearly and effectively in formal and informal spoken interactions. • Help learners construct well-organised written documents relevant to academic and workplace contexts.					
Oral Communication: Types (Verbal and Nonverbal), Interpersonal and group communication, Telephonic conversation. Suggested Activities: Short presentations, Debates, Formal Speeches (Welcome, Vote of Thanks and introducing guests), Listen and respond to short podcasts.					
Business Correspondence: Email Communication, Formal Letters (Types), Business Meeting. Suggested Activities: Email and letter writing (Complaint, request, permission), Agenda, minutes of the meeting.					
Academic Writing: Paraphrasing, Summarizing, Essay Writing, Instructions and Recommendations. Suggested Activities: Essay writing (Cause and effect, argumentative, persuasive), User guides/ manuals, policy document.					
Team Work: Leadership Skills (Team building, Team Leader, Team player), Negotiation and Problem solving skills Suggested Activities: SWOT Analysis, Brainstorming and Group discussions.					
Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%					
Methodology for Continuous Assessment: Worksheets (10%), Group Activity (20%), Report Writing (20%), Internal Examinations (50%)

	Description of CO	PO	PSO
CO1	Understand the importance of communication and drafting skills in engineering and technology.	---	
CO2	Apply listening strategies to comprehend spoken English in various contexts.	PO1(3)	PSO3(2)
CO3	Participate actively in group discussions by analysing critically from different views.	PO2(2) PO8(1)	PSO3(3)
CO4	Create written reports coherently for various purposes.	PO9(2)	PSO3(2)
CO5	Adapt communication styles to global, multicultural environments.	PO11(1)	PSO2(2)

ME25C05	Re-Engineering for innovation	L	T	P	C
		0	0	4	2
Course Objectives: • To cultivate foundational skills in prototyping, and automation for development of prototypes with real-world applications. • To provide a comprehensive, hands-on exposure to product development through reverse engineering concepts.					
Bootcamp 1: Introduction to Product Development, Reverse Engineering, Overview of the product lifecycle, Hands-on disassembly of simple products, Practice of basic measurements and sketching, Introduction to CAD modeling of disassembled parts, Virtual assembly of parts.					
Bootcamp 2: Embedded System Programming (Open-source platforms), Practice of interfacing sensors, reading data, automation in home, healthcare and agriculture.					
Reverse Engineering: Sketch and prototype alternative designs, Group brainstorming sessions, Manufacture prototype parts using 3D printing and / or workshop tools, Assemble prototype product.					
Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%					
Methodology for Continuous Assessment: Project (30%), Assignment (10%), Practical (30%), Internal Examinations (30%)

	Description of CO	PO	PSO
CO1	Understand the product development lifecycle, including stages such as concept generation, design, prototyping, and testing.	---	
CO2	Apply reverse engineering techniques to analyze and document existing products.	PO1 (3) PO2 (2)	PSO1(2)
CO3	Collaborate in teams to fabricate prototypes using appropriate tools.	PO5 (2) PO8 (1) PO9 (1)	PSO3(3)
CO4	Engage in independent learning and continuously adapt to emerging technologies in product design	PO11(2)	PSO2(2) PSO3(2)

UC25A03	Life Skills for Engineers – II	L	T	P	C
		1	0	2	1
Course Objectives: To impart and cultivate analytical reasoning, innovative thinking, effective collaboration, and ethical leadership to prepare students for complex challenges in professional and personal environments.					
Critical Thinking: Creativity, Critical Thinking, Collaboration, Problem Solving, Decision Making, Imagination, Intuition, Experience, Sources of Creativity, Lateral Thinking, Myths of creativity, Critical thinking Vs Creative thinking, Convergent & Divergent Thinking, Critical reading & Multiple Intelligence.					
Activities: Two-Brainstorm Method, “30 Circles” Challenge, “Desert Survival” Simulation, Lateral thinking riddles and puzzles, "What If?" Scenario Writing, Fast vs. Slow Thinking Game, Creativity Myth Busters					
Problem Solving: Techniques, Six Thinking Hats, Mind Mapping, Forced Connections. Analytical Thinking, Numeric, symbolic, and graphic reasoning. Scientific temperament and Logical thinking.					
Activities: Case study analysis, Escape Room challenge.					
Leadership: Leadership Styles & Self-Assessment, Communication & Active Listening, Decision-Making & Responsibility, Teamwork & Delegation, Empathy, Integrity & Conflict Management, Vision, Motivation & Goal-Setting.					
Activities: Crisis Leadership Simulation, Tower Challenge, Leadership Dilemmas Role-Play, Team Vision Board					
Weightage: Continuous Assessment: 100%					
Methodology for Continuous Assessment: Assignments (20%), Flipped Class & Worksheets (10%), Practical (30%), Internal Examinations (40%)

	Description of CO	PO	PSO
CO1	Explain the importance of leadership and management skills in life.	---	
CO2	Apply and demonstrate creative thinking techniques to generate innovative solutions.	PO7 (3)	PSO1(1) PSO2(1)
CO3	Exhibit effective collaboration and communication skills through teamwork, active listening, and conflict resolution strategies.	PO8 (2)	PSO3(3)
CO4	Integrate scientific temperament and logical reasoning into c problem solving in engineering and real-world contexts.	PO11 (2)	PSO2(1) PSO3(2)

UC25A04	Physical Education - II	L	T	P	C
		0	0	4	1
Course Objectives: To impart knowledge on gymnastic exercises and pressing needs for upskilling in a particular game.					
Basic gymnastics exercises: Warming up, Suitable exercise, Lead up games, Safety education, Movement education, Balanced Walk, execution, floor exercise, tumbling/acrobatics, grip, release, swinging, parallel bar exercise, horizontal bar exercise, flic-flac-walk and pyramids.					
Upskilling in any one of the athletics: Broad Jump, High Jump, Triple Jump, Relay Sprints, Javelin Throw, Discuss Throw, Shot Put, Short and Long-distance Running.					
Advance skills in any one of the indoor/outdoor games, which has been opted by the student in the I semester.					
Weightage: Continuous Assessment: 100%					
Methodology for Continuous Assessment: Attendance (60%), Quiz (10%), Participation in Sports and Games (20%) and Viva Voce (10%)

	CO Description	PO	PSO
CO1	Understand and explain the importance of physical activity for mental and physical health.	---	
CO2	Apply safety principles and methods during sports activities.	PO1(3)	PSO3(1)
CO3	Develop teamwork, discipline, and leadership through sports and group activities and collaborate effectively.	PO8 (3)	PSO3(2)
CO4	Demonstrate the advanced technical skills and strategic understanding in the game of their interest.	PO11(1)	PSO3(2)

Foreign Language^

UC25F01	Deutsch – I	L	T	P	C
		1	0	2	1
Course Objectives: To impart fundamentals of the Deutsch language, including reading, writing systems, pronunciation, and speaking.					
Basics & Introduction: German alphabet and pronunciation, Basic greetings and farewells, Introducing yourself and others (Ich heiße..., Wer bist du?), Numbers 1–100 and days of the week, Personal pronouns (ich, du, er, sie...), Sentence structure (SVO word order). Activities: Alphabet spelling game, short skits, Use color-coded cards for SVO sentences.					
Grammar Essentials & Everyday Vocabulary: Present tense of regular verbs (spielen, arbeiten, machen...), Common irregular verbs: sein (to be), haben (to have), gehen, kommen, Articles and gender (der, die, das; ein, eine), Simple questions and negation (nicht, kein), Describing people and things: adjectives and colors, Family, school, food, and common objects vocabulary. Activities: Conjugate regular and irregular verbs, “Question Chain” game, Create a simple family tree.					
Everyday Communication in German: Asking for and giving directions, Telling the time and talking about schedules, Ordering food and drinks at a café or restaurant, Talking about hobbies, weather, and daily routines, Listening to short conversations and responding appropriately, Introduction to German culture and formal/informal language use (du vs Sie). Activities: Ordering food and drinks, Give directions, Formal / Informal greetings, Do’s and Don’ts.					
Weightage: Continuous Assessment: 100%					
Methodology for Continuous Assessment: Assignments (30%), Quiz (10%) and Internal Examinations 60%					
References: Funk, H., Kuhn, C., & Demme, S. (2015). Menschen A1: Deutsch als Fremdsprache Kursbuch. Hueber Verlag.					

	CO Description	PO	PSO
CO1	Understand simple spoken Deutsch in everyday contexts.	---	
CO2	Communicate with widely used Deutsch words effectively.	PO9 (2)	PSO3(2)
CO3	Develop the skills necessary for self-directed learning and continuous improvement in Deutsch language.	PO11 (1)	PSO3(2)

UC25F02	Japanese – I	L	T	P	C
		1	0	2	1
Course Objectives: To impart fundamentals of the Japanese language, including reading, writing systems, pronunciation, and speaking.					
Writing Systems & Basic Communication: Introduction to Hiragana: vowels basic characters, reading & writing, Introduction to Katakana: basic characters and usage, Basic greetings and farewells (こんにちは, おはようございます, さようなら), Introducing yourself (名前、出身、年齢), Basic sentence structure: Subject–Object–Verb, Numbers 1–100, days of the week, classroom expressions. Activities: Flashcard games and writing drills, Self-introduction, Numbers & date-matching, Greeting expressions, Listening to audio.					
Grammar & Everyday Vocabulary: Particles: は (wa), を (wo), の (no), へ (e), に (ni), Present tense verbs: です, ます-form conjugation (たべます、のみます), Negative forms: ではありません, ません, Describing people and objects using adjectives (い and な), Question formation: なに、どこ、だれ、いつ, Vocabulary for family, food, colors, and basic actions. Activities: Verb conjugation drills, Guessing game, Picture description, “Shopping” with food vocab and counters					
Conversation & Cultural Etiquette: Talking about routines and schedules (daily verbs, time expressions), Asking and giving simple directions (～はどこですか?), Ordering food and making polite requests (～をください、～をおねがいします), Expressing likes and dislikes (すき・きらい), Listening to short conversations and identifying key phrases, Introduction to formal/informal speech and Japanese etiquette. Activities: Skits and role-plays, daily schedule, beginner-level dialogue, Group discussion on etiquette.					
Activities: Practice worksheets and flashcards for hiragana, Writing drills and reading simple katakana words, Dialogue practice for greetings and self-introduction, Sentence construction exercises with basic SOV structure, Particle usage exercises and short dialogues, Role-play scheduling, shopping, and telling time, Verb conjugation drills for common verbs, Descriptive sentence exercises using adjectives, Practice Q&A dialogues forming questions and negations, Kanji writing practice and quizzes for basic characters, Vocabulary tests and conversational practice on daily topics, Oral presentations and listening comprehension quizzes.					
Weightage: Continuous Assessment: 100%					

Methodology for Continuous Assessment: Assignments (30%), Quiz (10%) and Internal Examinations 60%

	CO Description	PO	PSO
CO1	Understand simple spoken Japanese in everyday contexts.	---	
CO2	Communicate with widely used Japanese words effectively.	PO9 (2)	PSO3(2)
CO3	Develop the skills necessary for self-directed learning and continuous improvement in Japanese language.	PO11 (1)	PSO3(2)

UC25F03	Korean – I	L	T	P	C
		1	0	2	1
Course Objectives: To impart fundamentals of the Korean language, including reading, writing systems, pronunciation, and speaking.					
Fundamentals of Korean: Introduction to Hangul: consonants and vowels, Basic pronunciation and syllable formation, Common greetings and self-introductions, Numbers (Sino-Korean and Native Korean basics), Basic sentence structure (Subject-Object-Verb), Simple expressions (e.g., 감사합니다, 안녕하세요).					
Activities: Writing and reading Hangul practice sheets, Pronunciation drills and audio repetition, Dialogue practice for greetings and self-introduction, Counting and number exercises.					
Essential Grammar and Vocabulary: Particles (은/는, 이/가, 을/를) and usage, Basic verbs and present tense conjugation, Sentence patterns: affirmative, negative, interrogative, Common adjectives and descriptive sentences, Expressing possession and location, Asking simple questions (어디, 뭐, 누구).					
Activities: Verb conjugation and sentence formation drills, Role-play conversations for shopping and daily routines, Descriptive writing and speaking exercises, Question and answer practice.					
Everyday Korean Communication: Polite speech levels and honorifics introduction, Talking about time, dates, and schedules, Ordering food, shopping phrases, counting objects, Simple directions and transportation vocabulary, Listening practice with short dialogues, Cultural notes on etiquette and communication.					
Activities: Role-play ordering at a restaurant or buying items, Listening comprehension exercises, Giving and asking for directions practice, Group conversations and presentations.					
Weightage: Continuous Assessment: 100%					
Methodology for Continuous Assessment: Assignments (30%), Quiz (10%) and Internal Examinations 60%

Semester III

MA25C03	Computational Differential Equations	L	T	P	C
		3	1	0	4
Course Objectives: The Objectives of the course are to equip students with the ability to formulate and solve various types of Ordinary and Partial Differential Equations (ODEs & PDEs) and to develop proficiency in applying numerical methods and computational tools for solving differential equations encountered in engineering problems.					
First Order Ordinary Differential Equations: Basic concepts of ordinary differential equations–Formation of first order differential equations from physical problems–First order and first-degree ODE: Variables separable–Exact equations–Leibnitz’s equation – Bernoulli’s equation – Numerical Methods: Solving first order ODE by Euler’s formula, Taylor series and Runge Kutta method of 4 th order. Activities: Application and Visualization of the first order ODE using open-source software and solving Competitive Examination questions					
Higher Order Ordinary Differential Equations: Formation of second order differential equations from physical problems–Linear equations of second and higher order with constant coefficients – Euler’s linear equations – Method of variation of parameters–Numerical Methods: Solving second order ODE by Runge-Kutta method of 4th order and finite difference method. Activities: solving ordinary differential equations using open-source software and solving of Competitive Examination questions					
First Order Partial Differential Equations: Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions - Solution of PDE by variable separable method – Solution of standard types of first order partial differential equations (excluding reducible to standard types) – Lagrange’s linear equation – Numerical Methods for first order PDE by Method of lines with Runge-Kutta method of order fourth. Activities: Application and Visualization of the Partial Differential Equations using open-source software and solving Competitive Examination questions					
Higher Order Partial Differential Equations: Linear homogeneous partial differential equations of second and higher order with constant coefficients. Numerical Methods: Finite difference techniques for the solution of two-dimensional Laplace’s and Poisson’s equations on rectangular domain—Solution of one-dimensional heat equation using Bender Schmidt and Crank Nicholson difference schemes—Solution of one-dimensional wave equation by explicit scheme.					

Activities: Application of the second order PDE using open-source software of 1-D wave, 1-D heat equations, Laplace and Poisson equations and Solving Competitive Examination questions

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%.

Assessment Methodology: Assignments (20%), Solution to application-oriented problems using software (20%), Solving Competitive Examination questions (20%), Internal Examinations (40%).

	Description of CO	PO	PSO
CO1	Explain first and higher-order ODEs using appropriate analytical and numerical techniques.	-	-
CO2	Solve higher-order PDEs using classical and finite difference methods.	PO1(3) PO5(3)	PSO1(2)
CO3	Apply various solution methods to differential equations arising in engineering contexts.	PO1(3) PO5(3)	PSO2(1)
CO4	Interpretation of numerical solutions for partial differential equations and using open-source software.	PO2(3) PO5(3) PO11(2)	PSO2(1)

CE25C02	Fluid Mechanics and Machinery	L	T	P	C
		3	1	0	4
Course objective: To introduce fundamental principles of fluid mechanics and apply them to analyze and solve practical civil engineering problems.					
Fluid Properties: Fluid properties - methods of analysis - system and control volume - pressure measurement					
Fluid Statics: Forces on plane and curved surfaces - buoyancy, flotation, and metacentric height.					
Activity: Construct simple floating models to study buoyancy, metacentric height, and hydrostatic forces.					
Fluid Flows: Flow classification, streamline concepts, stream function, flow nets; conservation laws (mass, energy, momentum), continuity equation, Euler's and Bernoulli's equations, and applications to flow measurement and pipe bends. Laminar flow, Reynolds experiment, Hagen–Poiseuille equation, Darcy–Weisbach equation, Moody diagram, pipe losses, and pipes in series and parallel.					
Activity: Review of Competitive Exam questions on pipe flow, discharge/velocity calculations, and pipe losses.					
Dimensional Analysis: Fundamental dimensions, dimensional homogeneity, Rayleigh's method, Buckingham Pi theorem, dimensionless parameters, similitude, model studies, and applications					
Activity: Quiz on dimensional analysis.					
Boundary Layers: Boundary layer concepts, laminar and turbulent flow, momentum integral equation, drag, lift, separation, and control measures.					
Turbines: Impact of jets, velocity triangles, rotodynamic machine theory, turbine classification, working principles of Pelton, Francis, and Kaplan turbines, work done efficiencies, draft tube, specific speed, performance curves, and governing.					
Activity: Prepare a poster on turbine working principles, performance, and efficiency.					
Pumps: Pump classification, centrifugal pumps, solar pumps - working principle, heads and efficiencies, velocity triangles, impeller work, performance curves; reciprocating pumps, indicator diagram, air vessels, and rotary pumps.					
Activity: Visit a pump installation or water treatment plant and prepare a report.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Report preparation from Site visit – 10%, Assignment – 15%, Internal Examinations – 50%

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Explain fundamental concepts of fluid properties, statics, and hydrostatics, including pressure measurement, buoyancy, and metacentric height.	-	-	-	-
CO2	Apply fluid flow principles, Bernoulli's and momentum equations, and pipe flow calculations to solve engineering problems	PO1 (3) PO2 (3)	3	2	1
CO3	Analyze dimensional analysis, boundary layers, and fluid flow behavior to evaluate drag, lift, and similitude in model studies.	PO1 (2) PO2 (3)	2	-	-
CO4	Design and evaluate turbines, pumps, and rotodynamic machines considering efficiency, performance curves, and operational parameters.	PO1 (2) PO2 (2) PO3 (3)	3	-	1

AG25C01	Engineering Geology	L	T	P	C
		3	0	0	3
Course objective: To impart knowledge on Earth’s structure, minerals, and rocks; geological processes; geophysical investigations; and landslide mitigation.					
Physical Geology: Role of geology in civil engineering, branches of geology, Earth structure and composition, weathering and soil formation, geomorphic processes (river, wind, groundwater, sea), plate tectonics, earthquakes, and seismic zones in India. Activity: Seminar using photographs, satellite images, or field observations to study weathering and landforms.					
Mineralogy: Physical properties of minerals; study of major minerals (quartz, feldspar, pyroxene, amphibole, mica, calcite, gypsum, clay minerals); Performance and decay of rock minerals.					
Petrology: Rock classification; igneous, sedimentary, and metamorphic rocks; engineering properties and uses of common rocks (granite, basalt/dolerite, sandstone, limestone, laterite, shale, quartzite, marble, gneiss, schist), quality testing of rocks.					
Activity: Site visit to nearby quarry/mine					
Structural Geology: Geological maps, attitude of beds, structural features (folds, faults, joints) and their engineering significance.					
Geophysical methods: Seismic and electrical techniques for subsurface investigations.					
Activity: Quiz on geophysical methods					
Geological Applications: Remote sensing in civil engineering; geological considerations in dams, reservoirs, tunnels, road cuttings, buildings and coastal structures; landslides—causes and mitigation.					
Activity: Case study on a dam/tunnel/road cutting/coastal structure/buildings focusing on geological issues and investigation.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Site visit report - 15%; Report preparation from Case study – 10%, Seminar report – 15%, Internal Examinations – 50%

CO – PO Mapping

	CO Description	PO Mapping	PSO	PSO2	PSO3
CO1	Explain fundamental geological processes, landforms, and plate tectonics with relevance to civil engineering.	-	-	-	-
CO2	Identify minerals and rocks and evaluate their engineering properties.	PO1 (3), PO2 (2)	3	2	-
CO3	Analyze geological structures and apply geophysical methods for subsurface investigation.	PO1 (2), PO2 (3)	2	3	-
CO4	Apply geological knowledge in the design of civil engineering projects and mitigation of natural hazards.	PO1 (2), PO2 (3)	3	1	1

CE25301	Strength of Materials I	L	T	P	C
		3	0	2	4
Course Objective: This course provides a foundational understanding of stress, strain, and deformation in solids, while developing analytical skills to evaluate internal forces, deflections, and torsional behaviour in structural members, springs, and pin-jointed plane trusses.					
Simple Stresses and Strains: Stress–strain concepts, Hooke’s law, elastic constants, stress–strain behavior of materials, axial deformation.					
Practical: - Tension Test on Mild Steel / HYSD Steel - Determination of Elastic Constants (E, G, ν) using bar / torsion tests. - Hardness testing of metals using: – Brinell hardness test and Rockwell hardness test					
Complex Stress Conditions and Mohr's Circle: Uniaxial, biaxial, and triaxial states of stress, thermal stresses in axially loaded composite bars, stresses on inclined planes, principal stresses and planes, Mohr’s circle.					
Activity: Prepare a poster explaining construction of Mohr’s circle					
Shear Force and Bending Moment: Beam types - loads (point load, UDL, UVL, effects of applied moments (concentrated and distributed) - SFD and BMD for cantilever, simply supported, and overhanging beams.					
Activity: Review of Competitive exam Questions related to SFD and BMD					
Bending and Shear Stresses: Bending theory, bending equation, stress distribution in beams and sections.					
Practical: Determination of ultimate shear stress of a mild steel rod by conducting a double shear test.					
Deflection of Beams: Double integration method - Macaulay’s method - Area moment method - Conjugate beam method for computation of slopes and deflections of determinant beams.					
Determination of Young’s modulus of a beam with rectangular cross section (metal and wooden specimens) by conducting deflection tests.					
Torsion, Springs, and Trusses: Torsion equation and assumptions, analysis of solid and hollow circular shafts, torsional rigidity, combined torsion and bending, shafts in series and parallel; helical springs (open and closed-coiled); analysis of determinate pin-jointed plane trusses using method of joints, sections.					
Practical: Open and Closed Coiled Helical Springs – Determine stiffness and deflection under load.					

Tasks:

1. Plot SFD and BMD for different beam configurations using MS-EXCEL or equivalent open-source simulation tools.
2. Conduct/compile results from key lab tests (tension, torsion, spring test) and interpret material properties and structural behavior.
3. Design a simple structural/mechanical system (e.g., shaft, spring, or truss) considering strength, stiffness, and safety, and justify the design with calculations.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Project (15%), Assignment Programs (25%), Practical (25%), Internal Examinations (30%)

CE25C03	Surveying and Geomatics	L	T	P	C
		3	0	0	3
Course objective: To study the various methods of surveying and understand the concept of control, control and modern surveying and also to use various survey instruments					
Levelling: Chain Surveying, Datum, benchmarks, levelling methods (fly and check), booking and reduction, contouring Theodolite Surveying: Horizontal and vertical angle measurements - Temporary and permanent adjustments - Trigonometric levelling - Single and double plane methods – Stadia tacheometry - Subtense method - Tangential tacheometry. Activity: Review of Competitive Exam Questions related to levelling and theodolite surveying. Modern Surveying: Total station - components, working, errors, applications; Bathymetry, GPS - components, data acquisition, errors, applications; Introduction to drone surveying and LiDAR. Activity: Case study report on GPS applications. Control Surveying, Adjustment: Horizontal and vertical control, triangulation, traversing, trilateration, coordinate computation; errors, weights, and adjustment of observations. Activity: Seminar on control surveying.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Case study report – 20%; Seminar report – 20%, Internal Examinations – 50%

CE25302	Computer-aided Building Drawing	L	T	P	C
		0	0	4	2
Course objective: The objective of this course is to introduce civil engineering students to the principles of building planning and architectural drawing. The course aims to develop proficiency in preparing accurate 2D and 3D building drawings using computer-aided drafting tools in accordance with standard building practices.					
List of Experiments 1. CAD Fundamentals CAD interface, coordinate systems, units, layers, basic draw and modify commands, annotation and dimensioning. 2. Building Components Drawing of walls, doors, windows, staircases, columns, lintels, roof truss (wood and steel) and other standard components. 3. Single-Storied Building Drawing Preparation of 2D plan, elevation, and sectional view of a residential building. 4. Multi-Storied Building Drawing Preparation of plans, elevations, and sections for multi-storied buildings with circulation and zoning. 5. 3D Modelling, Rendering Isometric drawings, 3D modelling, rendering, layout preparation, and plotting.					
Tasks (Perform any 3 tasks): Task 1: Prepare a 2D drawing using standard layers, dimensions, and annotations. Task 2: Create a detailed drawing sheet of standard building components as per specifications. Task 3: Develop complete drawings (plan, elevation, section) for a single-storied house. Task 4: Prepare multi-storey building drawings with staircases and structural details. Task 5: Create a 3D model with rendering and present drawings with title blocks.					
Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%					

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Apply CAD tools and commands for drafting basic engineering and building components with proper standards and conventions.	PO5 (3) PO7 (3) PO8 (2) PO9 (2)	2	1	-

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO2	Prepare detailed 2D drawings including plans, elevations, and sectional views for single and multi-storeyed buildings.	PO5 (3) PO8 (2) PO9 (2)	3	3	1
CO3	Develop 3D building models, renderings, and plot layouts for effective visualization and presentation of engineering drawings.	PO5 (3) PO8 (2) PO9 (2)	3	2	1

CE25C04	Surveying and Geomatics Laboratory	L	T	P	C
		0	0	4	2
Course Objective: To provide hands on experience in calibration of flow meters, performance characteristics of pumps and turbines.					
List of Experiments: 1. Levelling Operations: Fly levelling, check levelling, and benchmark transfer. 2. Contouring and Mapping: Grid levelling, contour mapping, and cut & fill volume estimation. 3. Theodolite Surveying: Measurement of horizontal angles by repetition and reiteration methods. 4. Total Station Surveying: Angle, distance, coordinate measurement, orientation, and resection methods. 5. Height and Distance Measurement: Determination of height using REM/trigonometric methods. 6. GPS Surveying: Navigation and feature collection using handheld GPS.					
Tasks: (Perform any 2 tasks) Task 1: Site Levelling and Earthwork Estimation: Perform levelling and contour mapping to estimate cut and fill volumes for a construction site. Task 2: Precision Survey and Layout: Measure horizontal angles using theodolite methods and apply them for setting out a simple structure. Task 3: Total Station Mapping: Conduct a topographic survey using Total Station and prepare contour and feature maps for planning. Task 4: Height and GPS Survey: Determine heights using REM method and integrate GPS data for mapping infrastructure features.					
Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%					
Methodology for Continuous Assessment: Project (30%), Assignment (10%), Practical (30%), Internal Examinations (30%)

EN25C03	English Communication Skills Laboratory– I	L	T	P	C
		0	0	2	1
Course Objectives: The objectives of the course are to foster students’ confidence and fluency in professional and social communication and to bridge the gap between academic English and industry expectations.					
List of Activities					
A. Elements of Effective Speaking and Listening (i) Sharing life experience/ turning point in their life – SATORI (ii) Situational Conversation – eg. Talking to a Senior about Internship Tips (iii) Welcoming a Guest Speaker at a Seminar (iv) Pictography to represent data using images or symbols (v) B2-C1 Listening exercises include lectures, interviews, and discussions.					
B. Mastering Presentations (i) Presentation Skills – Non-verbal communication (ii) Mini-Presentations: Topics like “My Dream Project,” “Engineering in 2050,”3-minute technical pitches with logical flow (iii) Technical Presentations with PPT					
C. Group Discussion Strategies: (i) Introduction to Group Discussions - Key skills for effective participation (ii) Phases in a GD and Conversational Phrases in GD. (iii) Group Discussions – Abstract and Factual topics					
D. Resume & LinkedIn Optimization (i) Building LinkedIn Profile – Drafting headlines and summaries (ii) Social Media Optimisation (iii) Preparing Video Resume					
E. Podcast-Based Language Learning: (i) Listening to podcast (motivational, career oriented, success stories) (ii) Podcast Preparation – Purpose – Topic – Structure – Recording Tips - Publication of the Podcast					
F. Mock Interviews and Communication Strategies: (i) Listening – Job interview (ii) Speaking – Mock interviews					

Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%.

Internal Assessment: 1. Listening (20 marks)

2. Video Resume (20 marks)

3. Creating a Podcast (30 marks)

4. Mock interview (30 marks)

End Semester Assessment: 1. Presentation with PPT (50 marks)

2. Group Discussion (50 marks)

Semester IV

CE25401	Strength of Materials II	L	T	P	C
		3	0	0	3
Course Objective: The course imparts knowledge on energy methods for deflection analysis, and equips students to analyse indeterminate beams, columns, and pressure vessels. It also develops understanding of three-dimensional stress, failure theories, and advanced bending in curved and unsymmetrical members.					
Energy Methods, and Deflection Analysis: Strain energy (axial load, shear, flexure, torsion) - Castigliano's theorems, Maxwell's reciprocal theorem, principle of virtual work, unit load method - deflection of determinate beams, frames, and trusses.					
Activity: Seminar on energy methods for deflection analysis.					
Indeterminate Beams: Analysis of propped cantilever, fixed and continuous beams; fixed end moments, theorem of three moments, analysis of continuous beams, sinking of supports.					
Activity: Quiz on analysis methods and bending moment diagrams.					
Columns: Euler's theory, Rankine-Gordon formula, eccentrically loaded columns; middle third rule.					
Pressure Vessels: Thin and thick cylinders and spheres, compound thick cylinders, Shrinking on stresses.					
Activity: Flipped classroom on column theories with problem-solving.					
3D Stress, Failure Theories: Stress components, principal stresses, stress invariants, and failure theories.					
Activity: Poster presentation on failure theories and stress states.					
Advanced Bending, Curved Structures: Unsymmetrical bending, curved beams, Winkler-Bach theory, Stresses in links and hooks.					
Activity: Model making to demonstrate bending and curved beam behavior.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Seminar report – 10%; Model making – 15%; Internal Examinations – 50%

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Explain concepts of strain energy, indeterminate structures, columns, pressure vessels, and three-dimensional stress.	-	-	-	-
CO2	Apply energy methods and principles to determine deflections in beams, frames, and trusses.	PO1 (3), PO2 (3), PO3 (2)	3	2	-
CO3	Analyze statically indeterminate beams, columns, and pressure vessels under various loading conditions.	PO1 (3), PO2 (3), PO3 (3)	3	2	-
CO4	Evaluate structural behavior using failure theories and advanced bending concepts in curved and unsymmetrical members.	PO1 (3), PO2 (2), PO3 (2)	3	3	2

CE25402	Soil Mechanics	L	T	P	C
		3	0	0	3
Course objective: To enable the students to acquire the essential knowledge about the index and engineering properties of soils and their practical relevance.					
Soil Classification Soil formation, structure, clay minerals, phase relationships, index properties, classification of soils (BIS, Unified). Activity: Collect soil samples and perform visual identification. Soil Compaction: Theory, Laboratory and field tests – Field Compaction methods – Factors influencing compaction of soils. Effective Stress, Permeability: Soil water - Effective stress, capillarity, Darcy’s law, hydraulic conductivity, laboratory and field permeability tests, seepage, quicksand, and flow nets. Activity: Review of Competitive Exam questions related to simple flow nets for sheet pile or weir problems. Stress Distribution: Stress distribution in homogeneous and isotropic medium – Boussinesq theory – (Point load, Line load and udl) - Use of New marks influence chart. Consolidation Settlement: Terzaghi’s one dimensional consolidation theory – Computation of rate of settlement - $\sqrt{t}$ and log t methods– e-log p relationship. Activity: Quiz on stress distribution Shear Strength: Shear strength of soils, Mohr–Coulomb theory, shear tests (direct shear, triaxial, UCC, vane shear), pore pressure parameters, liquefaction. Activity: Poster on shear strength tests and applications. Slope Stability: Infinite slopes and finite slopes – Total stress analysis for saturated clay – Friction circle method – Use of stability number – Method of slices – Fellenius method - Slope protection measures. Activity: Case study on slope failure and mitigation.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Seminar report – 10%; Model making – 15%; Internal Examinations – 50%

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Explain soil properties, classification and compaction characteristics to assess their suitability for engineering applications.	-	-	-	-
CO2	Apply effective stress, permeability, and seepage concepts to analyze soil–water interaction and groundwater flow problems.	PO1 (3), PO2 (3)	3	2	1
CO3	Analyze stress distribution, consolidation behavior, and settlement of soils under various loading conditions.	PO1 (3), PO2 (3)	3	2	-
CO4	Evaluate shear strength and slope stability of soils using appropriate theories, laboratory parameters, and analytical methods.	PO1 (3), PO2 (3), PO3 (2)	3	2	2

CE25C05	Water Supply Engineering	L	T	P	C
		3	0	0	3
Course objective: To enable students to understand the planning, design, treatment, and distribution of safe and sustainable water supply systems, including source selection, water quality assessment, treatment technologies, and distribution networks in accordance with codal provisions.					
Sources, Quality of Water: Planning of water supply, population forecasting, water demand, sources (surface & groundwater), water quality and standards. Activity: Poster on water sources and quality comparison for a town. Collection, Conveyance: Intake structures, pipe materials, hydraulics of pipe flow, Transmission main design – Laying, jointing and testing of pipes, pumps and appurtenances. Activity: Model Making of an intake and conveyance system. Conventional Water Treatment: Unit operations and processes – Principles, functions, and design of water treatment plant units, aerators, flash mixers, Coagulation and flocculation –Design of Clarifloccuator-Plate and tube settlers - Pulsator clarifier - sand filters - Disinfection - Residue Management – Operation and Maintenance aspects. Advanced Water Treatment: Sequencing Batch Reactor - Moving bed biofilm Reactor - Membrane Bioreactor - UASB - Biogas recovery - Reclamation and Reuse of sewage - Constructed Wetland - Nutrient removal systems - Desalination. Activity: Site Visit to a municipal water treatment plant. Distribution Systems: Components – Selection of pipe material – Service reservoirs Functions – Network design – Analysis of distribution networks – Appurtenances - Leak detection. Building Water Supply: House service connection – Fixtures and fittings, systems of plumbing and types of plumbing- relevant NBC provisions. Activity: Case-based exercise on building water supply design.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Site visit report – 10%; Model making – 15%; Internal Examinations – 50%

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Explain water sources, quality parameters, and planning aspects of water supply systems as per standards.	-	-	-	-
CO2	Apply principles of intake design, conveyance, and pipe flow to design water transmission systems.	PO1 (3), PO2 (3), PO3 (2)	3	1	1
CO3	Analyze conventional and advanced water treatment processes and evaluate their performance.	PO1 (3), PO2 (3), PO3 (2)	3	2	1
CO4	Evaluate water distribution systems and design components ensuring safe and sustainable supply.	PO1 (3), PO2 (3), PO3 (2)	3	2	2

CE25403	Introduction to Standards in Civil Engineering	L	T	P	C
		1	0	0	1
Course Objective: To familiarize students with important BIS, IRC, environmental, and structural codes and enable their effective application in planning, design, construction, and infrastructure management.					
Overview of Standards Basic concepts of standardization; Purpose of Standardization, marking and certification of articles and processes; Importance of standards to industry, policy makers, trade, sustainability and innovation. Objectives, roles and functions of BIS, Bureau of Indian Standards Act, ISO/IEC Directives; WTO Good Practices for Standardization. Important Indian and International Standards. Activity: Quiz on accreditation and certification bodies					
Civil Engineering Standards Structural Engineering: National Building Construction Standards (NBCS) IS 875 (1-5) Code of Practice for Design Loads (Other Than Earthquake) For Buildings and Structures IS 800 General Construction using Hot Rolled Steel Sections IS 456 Code of practice: Plain and Reinforced Concrete Design IS 1893 Code of Practice: Criteria for Earthquake Resistant Design of Structures- General Provisions and Buildings IS 1343 Code of Practice for Prestressed Concrete Soil Mechanics and Foundation Engineering: Soil Engineering Terms (IS2809) - Soil Testing and Characterization (IS 2720) – Soil Identification and Classification (IS1498) – Subsurface Exploration (IS 1892) – Field Testing for Bearing Capacity (IS2131, IS4968, IS1888) - General Requirements of Foundations (IS1904) – Bearing Capacity of Shallow Foundations (IS 6403) – Settlement of Foundation (IS 8009) – Pile Foundations (IS2911) – Raft Foundations (IS2650). Transportation Engineering: Road safety Audit (IRC: SP-88) –Pedestrian Facilities (IRC:103) - Parking Facilities (IRC: SP:12) - Cycle track (IRC 11) Indo- Highway Capacity Manual- Case Studies. Water Resources Engineering: IS 4986 Installation of Rain gauge (Non-Recording Type) and Measurement of Rain and Code of Practice IS 15797 Roof top rainwater harvesting IS 15896 Manual methods for measurement of groundwater level in a well IS 15792 code guide lines for Artificial recharge to groundwater IS 7113 Code of practice for Soil – Cement lining for canals					

Environmental Engineering:

BIS – Drinking water specifications (IS:10500)
 National Ambient Air Quality Standards
 Minimal National Standards (MINAS) for Industry
 Noise limits for vehicles
 Airport Noise Notification
 Activity: Flipped classes for codes

Assessment Weightage: Internal Assessment :100%

Methodology for Continuous Assessment: Quiz - 25%, Flipped classes – 25%,
 Internal Examinations – 50%

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Understand the principles, objectives, and institutional frameworks of standardization, accreditation, and certification at national and international levels.	-	-	-	-
CO2	Apply relevant Indian and international standards in civil engineering disciplines to ensure safety, quality, sustainability, and regulatory compliance in engineering practice.	PO1 (3), PO6 (2), PO7 (3)	3	3	2

CE25C06	Concrete Technology	L	T	P	C
		3	0	2	4
Course objective: To impart fundamental knowledge of concrete materials, mix proportioning, and testing as per IS codes, and to develop the ability to design, evaluate, and apply conventional and special concretes for safe, durable, and sustainable construction practices.					
Concrete Materials: Cement types, composition, properties, tests as per IS codes; aggregates (fine and coarse), properties, grading, and tests; quality of water for concrete. Practical: 1. Tests on Cement (fineness, consistency, setting time, specific gravity); 2. Tests on aggregate (grading, specific gravity, bulk density, impact, crushing, flakiness, elongation). Admixtures and Fibres: Chemical admixtures (accelerators, retarders, plasticizers, superplasticizers, water proofers); mineral admixtures (fly ash, silica fume, GGBS, metakaolin); fibres and their effects on concrete properties. Activity: Flipped classroom on mineral admixtures Concrete Mix Design: Principles of mix proportioning, nominal and design mix (with and without admixtures), BIS method, material properties for mix design, quality control and assurance. Activity: Concrete mix proportioning and fresh concrete testing (IS 516). Fresh and Hardened Concrete: Workability tests (slump, compaction factor), segregation, bleeding, NDT tests (rebound hammer, UPV), compressive and flexural strength, modulus of elasticity, durability studies. Practical: 3. Determination of slump of concrete 4. Determination of compressive strength of concrete Special Concretes: High strength concrete, HPC, SCC, fiber reinforced concrete, ferrocement, ready mix concrete, shotcrete, polymer concrete, geopolymer concrete, sustainable concrete, 3D printing. Activity: Poster presentation on special concretes.					

Tasks:

1. Evaluate the properties of cement, aggregates, and water through laboratory testing and compare the results with IS code requirements.
2. Design and prepare a concrete mix for a specified grade using BIS guidelines and assess its fresh concrete properties.
3. Cast concrete specimens, determine compressive strength, and interpret the quality and durability characteristics of concrete.
4. Study a special concrete technology and present its materials, properties, applications, and sustainability benefits in construction.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Project (15%), Assignment (25%), Practical (25%), Internal Examinations (30%)

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Evaluate the properties of cement, aggregates, and water through standard laboratory tests as per relevant IS codes.	PO2 (2) PO4 (3) PO5 (2) PO7 (3) PO8 (2)	2	2	1
CO2	Analyze the influence of chemical admixtures, mineral admixtures, and fibres on the fresh and hardened properties of concrete.	PO2 (2) PO4 (3) PO5 (2) PO8 (2)	3	2	1
CO3	Design and proportion concrete mixes using BIS methods and assess workability and quality control parameters.	PO1 (3) PO3 (3) PO7 (2) PO8 (2)	3	3	2
CO4	Determine the strength, durability, and performance of concrete, including special concretes, using standard and non-destructive testing methods.	PO1 (3) PO4 (3) PO5 (2) PO8 (3)	3	3	1

CE25404	Design of Reinforced Cement Concrete Elements	L	T	P	C
		3	0	0	3
Course Objective To introduce the different design philosophy and thorough knowledge about reinforced concrete structural elements such as beams, column, roof slab, foundation and water tanks.					
Design Concepts, Beams: Design concepts - Concept of elastic method, ultimate load method and limit state method - Advantages of limit state method over other methods - Design of rectangular beam section by working stress method - Limit state method of design of singly reinforced, doubly reinforced and flanged beams - Use of design aids for flexure. Activity: Design assignment on singly and doubly reinforced beams. Slabs, Staircase: Analysis and design of cantilever, one way simply supported and continuous slabs and supporting Beams-Two-way slab- Design of simply supported and continuous slabs using IS code coefficients- Types of Staircases - Design of dog-legged Staircase. Activity: Problem-based learning on slab and staircase design. Columns: Types of columns –Axially Loaded, Uni axial and Bi axial bending columns - Design of short rectangular axial, Uni-axial and Bi-axial bending columns. Activity: Bar bending schedule using Excel. Footings and Foundations: Concepts of Proportioning footings - Design of axially loaded footing- Wall footings- Combined footings (Rectangular, Circular and Trapezoidal)- Strap footing- Design principles of Raft footing. Activity: Quiz on footing design concepts. Retaining Structures: Types of retaining walls – Applications- Structural behaviour of retaining walls- Stability requirements of retaining wall - Design of Cantilever retaining wall and Counterfort retaining wall – detailing of reinforcement. Activity: Model making of retaining wall systems.					
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%					
Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Site visit report – 10%; Model making – 15%; Internal Examinations – 50%

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Explain design philosophies and behavior of reinforced concrete structural elements.	-	-	-	-
CO2	Apply limit state design principles to design beams, slabs, and staircases.	PO1 (2) PO2 (3) PO3 (3)	3	2	-
CO3	Analyze and design columns and footings under different loading conditions.	PO1 (2) PO2 (3) PO3 (3)	3	2	-
CO4	Evaluate and design retaining structures ensuring stability and safety requirements.	PO1 (2) PO2 (3) PO3 (3)	3	3	2

CE25405	Highway Engineering	L	T	P	C
		3	0	2	4
Course objective: To provide a comprehensive understanding of highway engineering, including planning, alignment, geometric design, pavement materials and design, as well as construction, distresses, and maintenance of pavements for efficient and sustainable transportation systems.					
Highway Planning and Alignment: History of road development in India - Classification of highways - Institutions for Highway planning, design and construction at different levels - factors influencing highway alignment - Road ecology - engineering surveys (conventional and modern).					
Activity: Quiz on Highway Planning and Alignment					
Geometric Design of Highways: Typical Cross sections, sight distances, horizontal alignment (super elevation, transition curves), vertical alignment (gradients, summit and valley curves).					
Activity: Poster presentation on geometric design elements. Poster presentation on geometric design of highways					
Flexible Pavement Design: Desirable properties of subgrade soil, road aggregates and bituminous materials, testing methods - Pavement components and their functions - Factors influencing the design of pavements - IRC guidelines.					
Practical: 1. Tests on bitumen (specific gravity, penetration, viscosity, softening point, ductility) 2. Demonstration of Marshall test.					
Rigid Pavement Design: Components, stresses (Westergaard theory), temperature and frictional stresses, joints, dowel and tie bars, IRC guidelines.					
Activity: Field visit to pavement construction site.					
Highway Construction and Maintenance: Construction of pavement layers, sustainable materials, methods and machinery, Highway drainage - Special considerations for hilly roads; Pavement failures - Types and causes of failures in flexible and rigid pavements, Evaluation and Maintenance of Pavements.					
Activity: Case study on pavement failures and maintenance methods.					
Tasks: (Any 2 tasks) Task 1: Highway Alignment and Geometric Design Select a route and design horizontal and vertical alignment with proper sight distance and cross-sectional elements.					

Task 2: Flexible Pavement Design

Design a flexible pavement using IRC guidelines based on given traffic and soil data.

Task 3: Rigid Pavement Design

Analyze stresses and design a rigid pavement slab with joints and reinforcement details.

Task 4: Pavement Evaluation and Maintenance Plan

Identify pavement distresses from a case study and propose suitable maintenance and rehabilitation measures.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Site visit report – 10%; Model making – 15%; Internal Examinations – 50%

CE25C07	Fluid Mechanics and Machinery Laboratory	L	T	P	C
		0	0	4	2
Course Objective: To provide hands on experience in calibration of flow meters, performance characteristics of pumps and turbines.					
List of Experiments: 1. Flow Measurement Devices Calibration of rotameter and flow measurement using venturimeter/orifice meter/notches. 2. Bernoulli’s Theorem - Verification of Bernoulli’s equation. 3. Losses in Pipes - Determination of friction factor and minor losses. 4. Pumps - Performance characteristics of centrifugal and reciprocating pump. 5. Turbines -Performance characteristics of Pelton and Francis turbine. 6. Metacentric Height - Determination of metacentric height of floating bodies.					
Tasks: (Perform any 2 tasks) Task 1: Compare discharge values obtained from different devices and analyze errors. Task 2: Evaluate major and minor losses in the system and Compare experimental results with theoretical/Moody chart values. Task 3: Plot performance curves and determine the specific speed of a centrifugal pump Task 4: Plot characteristic curves (H–Q, η –Q) and determine efficiency of a reciprocating pump. Task 5: Assess stability conditions and compare with theoretical values.

EN25C04	English Communication Skills Laboratory– II	L	T	P	C
		0	0	2	1
Course Objectives: The objectives of the course are to build students' advanced communication skills for workplace readiness and develop intercultural competence for effective collaboration in global and virtual teams. Prepare students for competitive exams with focused skill-building and test-oriented practice.					
List of Activities					
Stage Ready – Impactful Public Speaking . (i) Simulate a formal event such as an academic conference, convocation, or awards ceremony, where students roles including Master of Ceremonies (MC), Role as a dignitary, and a Commentator (ii) Visual Prompt Storytelling: Use random images to create spontaneous stories, focusing on plot, setting, and character, (iii) Digital Presentation - Record a short video explaining a project or technical concept, using slides, voiceover, and visual aids (to be uploaded using google classroom or drive link)					
Professional and Application-Oriented Writing (i) Résumé Preparation: Design ATS-friendly résumés tailored to various job descriptions, using action verbs and quantifiable impact. · (ii) Design engaging content for poster presentation relevant to their domain.					
Receptive Skills in Workplace Communication· (i) Reading articles related to their domain and discuss in groups (ii) Visit company websites, make inferences and present in the class (iii) Listen to recorded mock interviews and take detailed notes. Summarise key points and action items in a professional format and make a presentation.					
Intercultural Communication (i) Assertive vs Aggressive communication (ii) Role play activities – workplace communication in intercultural/crosscultural contexts					
From Campus to Career: Industry Skills and Global Exam Preparation (i) Participate in HR interviews using AI tools or peer interviewers, responding to behavioural questions using methods like STAR (Situation, Task, Action, Result) (ii) Practice Verbal Ability in competitive exams like UPSC, SSC, CDS, TNPSC, etc.					
Weightage: Continuous Assessment: 60%, End Semester Lab Examinations: 40%.					
Internal Assessment Methodology: 1. Oral story telling using visual prompts (30 marks)					

2. Poster presentation (40 marks) 3. ATS resume writing (30 marks)	
End Semester Assessment: 1. Interview (50 marks) 2. Verbal Ability test (50 marks) (students must bring the resume but evaluation must be done based on the performance in the interview)
